ACADEMIC LEADERSHIP CHARTER SCHOOL

HELLO  
SUMMER

JULY 2026

What a creative summer we've had in the art room! Inspired by Fernand Léger, students designed vibrant city themed artworks. They also studied the work of Frank Stella and Carmen Herrera, creating their own hard edge abstract paintings with carefully taped geometric designs and crisp, clean color fields.

Students worked with clay, learning how to shape, build, and add texture before painting their finished sculptures with colorful details. It was exciting to watch each student's unique ideas come to life in three dimensions!

One of the biggest highlights of summer was our slime exploration lab! Students experimented with a variety of slime recipes, discovering how different ingredients changed the texture, stretchiness, and appearance of their creations.

Thank you to all of our students and families for making Summer Art School such a wonderful experience. We hope everyone has a safe, relaxing, and fun remainder of the summer, and we look forward to creating more amazing art together in the coming school year!
